QUANTITATIVE FORECASTING

**NCAA FOOTBALL T-2 FULL SLATE — AUGUST 29,
2026**

8 FanDuel-issuable games · 16 sealed positions · 43 market-pending games

All displayed values are read from the same append-only NCAA day authority. FanDuel markets are authentic full-game propositions; no missing market is invented.

G01 · North Carolina at TCU

KICKOFF 12:00 PM ET · Aviva Stadium · FANDUEL

FULL-GAME ATS · North Carolina +8.5

APEX 57.1% · STRONG · FanDuel -108 · Fair -133

FanDuel had North Carolina +8.5 at -108 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the underdog with a 57.1% calibrated win probability after keeping push mass separate, which maps to the STRONG tier.

At the exact FanDuel spread, the frozen margin distribution assigns 42.9% to the favorite covering, 0.0% to a push, and 57.1% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 8.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -133 versus FanDuel's -108, with a +5.2-percentage-point probability edge and +0.101 expected units per unit staked.

The final call remains North Carolina +8.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 46.5

APEX 50.1% · WEAK · FanDuel -105 · Fair -100

FanDuel posted 46.5 for the full-game total at -105 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 50.1% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel total, the frozen distribution assigns 49.9% to Over, 0.0% to a push, and 50.1% to Under.

The complete scoring distribution has a mean of 46.5, a median of 46, and a mode of 46 total points against the posted 46.5.

Its central 80% interval runs from 25 to 68 points, a 43-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -100 versus FanDuel's -105, with a -1.1-percentage-point probability edge and -0.022 expected units per unit staked.

The final call remains UNDER 46.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G02 · San José State at USC

KICKOFF 3:00 PM ET · Los Angeles Memorial Coliseum · FANDUEL

FULL-GAME ATS · San José State +38.5

APEX 91.3% · ELITE · FanDuel -112 · Fair -1047

FanDuel had San José State +38.5 at -112 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the underdog with a 91.3% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel spread, the frozen margin distribution assigns 8.7% to the favorite covering, 0.0% to a push, and 91.3% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 38.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -1047 versus FanDuel's -112, with a +38.5-percentage-point probability edge and +0.728 expected units per unit staked.

The final call remains San José State +38.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 61.5

APEX 81.8% · ELITE · FanDuel -110 · Fair -448

FanDuel posted 61.5 for the full-game total at -110 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 81.8% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel total, the frozen distribution assigns 18.2% to Over, 0.0% to a push, and 81.8% to Under.

The complete scoring distribution has a mean of 46.5, a median of 46, and a mode of 46 total points against the posted 61.5.

Its central 80% interval runs from 25 to 68 points, a 43-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -448 versus FanDuel's -110, with a +29.4-percentage-point probability edge and +0.561 expected units per unit staked.

The final call remains UNDER 61.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G03 · NC State at Virginia

KICKOFF 3:30 PM ET · Scott Stadium · FANDUEL

FULL-GAME ATS · Virginia -4.5

APEX 51.8% · WEAK · FanDuel -105 · Fair -107

FanDuel had Virginia -4.5 at -105 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the favorite with a 51.8% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel spread, the frozen margin distribution assigns 51.8% to the favorite covering, 0.0% to a push, and 48.2% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 4.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -107 versus FanDuel's -105, with a +0.5-percentage-point probability edge and +0.011 expected units per unit staked.

The final call remains Virginia -4.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 51.5

APEX 62.1% · ELITE · FanDuel -114 · Fair -164

FanDuel posted 51.5 for the full-game total at -114 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 62.1% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel total, the frozen distribution assigns 37.9% to Over, 0.0% to a push, and 62.1% to Under.

The complete scoring distribution has a mean of 46.5, a median of 46, and a mode of 46 total points against the posted 51.5.

Its central 80% interval runs from 25 to 68 points, a 43-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -164 versus FanDuel's -114, with a +8.8-percentage-point probability edge and +0.165 expected units per unit staked.

The final call remains UNDER 51.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G04 · Jacksonville State at North Dakota State

KICKOFF 5:30 PM ET · Fargodome · FANDUEL

FULL-GAME ATS · Jacksonville State +6.5

APEX 51.1% · WEAK · FanDuel -102 · Fair -104

FanDuel had Jacksonville State +6.5 at -102 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the underdog with a 51.1% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel spread, the frozen margin distribution assigns 48.9% to the favorite covering, 0.0% to a push, and 51.1% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 6.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -104 versus FanDuel's -102, with a +0.6-percentage-point probability edge and +0.011 expected units per unit staked.

The final call remains Jacksonville State +6.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 46.5

APEX 50.6% · WEAK · FanDuel -110 · Fair -102

FanDuel posted 46.5 for the full-game total at -110 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 50.6% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel total, the frozen distribution assigns 49.4% to Over, 0.0% to a push, and 50.6% to Under.

The complete scoring distribution has a mean of 46.3, a median of 46, and a mode of 46 total points against the posted 46.5.

Its central 80% interval runs from 25 to 68 points, a 43-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -102 versus FanDuel's -110, with a -1.8-percentage-point probability edge and -0.034 expected units per unit staked.

The final call remains UNDER 46.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G05 · Sacramento State at Eastern Michigan

KICKOFF 6:30 PM ET · Rynearson Stadium · FANDUEL

FULL-GAME ATS · Sacramento State +9.5

APEX 57.9% · STRONG · FanDuel -110 · Fair -137

FanDuel had Sacramento State +9.5 at -110 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the underdog with a 57.9% calibrated win probability after keeping push mass separate, which maps to the STRONG tier.

At the exact FanDuel spread, the frozen margin distribution assigns 42.1% to the favorite covering, 0.0% to a push, and 57.9% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 9.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -137 versus FanDuel's -110, with a +5.5-percentage-point probability edge and +0.105 expected units per unit staked.

The final call remains Sacramento State +9.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 53.5

APEX 67.6% · ELITE · FanDuel -105 · Fair -208

FanDuel posted 53.5 for the full-game total at -105 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 67.6% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel total, the frozen distribution assigns 32.4% to Over, 0.0% to a push, and 67.6% to Under.

The complete scoring distribution has a mean of 46.0, a median of 46, and a mode of 46 total points against the posted 53.5.

Its central 80% interval runs from 25 to 67 points, a 42-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -208 versus FanDuel's -105, with a +16.3-percentage-point probability edge and +0.319 expected units per unit staked.

The final call remains UNDER 53.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G06 · Hawai'i at Stanford

KICKOFF 7:00 PM ET · Stanford Stadium · FANDUEL

FULL-GAME ATS · Stanford -4.5

APEX 51.8% · WEAK · FanDuel -105 · Fair -107

FanDuel had Stanford -4.5 at -105 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the favorite with a 51.8% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel spread, the frozen margin distribution assigns 51.8% to the favorite covering, 0.0% to a push, and 48.2% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 4.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -107 versus FanDuel's -105, with a +0.5-percentage-point probability edge and +0.011 expected units per unit staked.

The final call remains Stanford -4.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 48.5

APEX 55.1% · MODERATE · FanDuel -105 · Fair -123

FanDuel posted 48.5 for the full-game total at -105 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 55.1% calibrated win probability after keeping push mass separate, which maps to the MODERATE tier.

At the exact FanDuel total, the frozen distribution assigns 44.9% to Over, 0.0% to a push, and 55.1% to Under.

The complete scoring distribution has a mean of 46.4, a median of 46, and a mode of 46 total points against the posted 48.5.

Its central 80% interval runs from 25 to 68 points, a 43-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -123 versus FanDuel's -105, with a +3.9-percentage-point probability edge and +0.076 expected units per unit staked.

The final call remains UNDER 48.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G07 · New Mexico State at Florida State

KICKOFF 7:00 PM ET · Doak Campbell Stadium · FANDUEL

FULL-GAME ATS · New Mexico State +31.5

APEX 85.7% · ELITE · FanDuel -115 · Fair -598

FanDuel had New Mexico State +31.5 at -115 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the underdog with a 85.7% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel spread, the frozen margin distribution assigns 14.3% to the favorite covering, 0.0% to a push, and 85.7% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 31.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -598 versus FanDuel's -115, with a +32.2-percentage-point probability edge and +0.602 expected units per unit staked.

The final call remains New Mexico State +31.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 54.5

APEX 69.6% · ELITE · FanDuel -114 · Fair -229

FanDuel posted 54.5 for the full-game total at -114 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 69.6% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.

At the exact FanDuel total, the frozen distribution assigns 30.4% to Over, 0.0% to a push, and 69.6% to Under.

The complete scoring distribution has a mean of 46.1, a median of 46, and a mode of 46 total points against the posted 54.5.

Its central 80% interval runs from 25 to 67 points, a 42-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -229 versus FanDuel's -114, with a +16.3-percentage-point probability edge and +0.306 expected units per unit staked.

The final call remains UNDER 54.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

G08 · Memphis at UNLV

KICKOFF 10:00 PM ET · Allegiant Stadium · FANDUEL

FULL-GAME ATS · UNLV -4.5

APEX 51.8% · WEAK · FanDuel -105 · Fair -107

FanDuel had UNLV -4.5 at -105 when APEX sealed this full-game ATS position at T-2.

The locked GLOBAL_EMPIRICAL_V1 engine selects the favorite with a 51.8% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel spread, the frozen margin distribution assigns 51.8% to the favorite covering, 0.0% to a push, and 48.2% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 6.9 points, with a median of 6 and a mode of 3 relative to the 4.5-point market hurdle.

Its central 80% interval runs from -21 to 36 favorite-margin points, a 57-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -107 versus FanDuel's -105, with a +0.5-percentage-point probability edge and +0.011 expected units per unit staked.

The final call remains UNLV -4.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 56.5

APEX 73.0% · ELITE · FanDuel -110 · Fair -270

FanDuel posted 56.5 for the full-game total at -110 on the selected UNDER side when APEX sealed the T-2 position.

The locked RIDGE_GAUSSIAN_A100_V1 engine selects UNDER with a 73.0% calibrated win probability after keeping push mass separate, which maps to the ELITE tier.
