G01 · Massachusetts at Rutgers

KICKOFF 6:00 PM ET · SHI Stadium · FANDUEL

FULL-GAME ATS · Rutgers -28.5

APEX 55.4%

MODERATE

FanDuel -115 · Fair -124

FanDuel had Rutgers -28.5 at -115 when APEX sealed this full-game ATS position at T-2.

The locked D2 engine selects the favorite with a 55.4% calibrated win probability after keeping push mass separate, which maps to the MODERATE tier.

At the exact FanDuel spread, the frozen margin distribution assigns 55.4% to the favorite covering, 0.0% to a push, and 44.6% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 30.6 points, with a median of 31 and a mode of 31 relative to the 28.5-point market hurdle.

Its central 80% interval runs from 11 to 49 favorite-margin points, a 38-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -124 versus FanDuel's -115, with a +1.9-percentage-point probability edge and +0.036 expected units per unit staked.

The final call remains Rutgers -28.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 52.5

APEX 52.0%

WEAK

FanDuel -102 · Fair -108

FanDuel posted 52.5 for the full-game total at -102 on the selected UNDER side when APEX sealed the T-2 position.

The locked TOTALS-V5-RECONCILED-POOL engine selects UNDER with a 52.0% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel total, the frozen distribution assigns 48.0% to Over, 0.0% to a push, and 52.0% to Under.

The complete scoring distribution has a mean of 52.5, a median of 52, and a mode of 55 total points against the posted 52.5.

Its central 80% interval runs from 32 to 73 points, a 41-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -108 versus FanDuel's -102, with a +1.5-percentage-point probability edge and +0.029 expected units per unit staked.

The final call remains UNDER 52.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

Its central 80% interval runs from 37 to 79 points, a 42-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -114 versus FanDuel's -105, with a +2.0-percentage-point probability edge and +0.039 expected units per unit staked.

The final call remains UNDER 58.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.

KICKOFF 9:00 PM ET · Memorial Stadium (Champaign, IL) · FANDUEL

FULL-GAME ATS · UAB +27.5

APEX 50.3%

WEAK

FanDuel -118 · Fair -101

FanDuel had UAB +27.5 at -118 when APEX sealed this full-game ATS position at T-2.

The locked D2 engine selects the underdog with a 50.3% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel spread, the frozen margin distribution assigns 49.7% to the favorite covering, 0.0% to a push, and 50.3% to the underdog covering.

The Favorite-minus-Underdog margin distribution centers at 27.5 points, with a median of 27 and a mode of 24 relative to the 27.5-point market hurdle.

Its central 80% interval runs from 9 to 46 favorite-margin points, a 37-point span that makes the forecast uncertainty explicit.

The selected side's model fair price is -101 versus FanDuel's -118, with a -3.8-percentage-point probability edge and -0.071 expected units per unit staked.

The final call remains UAB +27.5: the selection follows the larger decisive-outcome probability, while the 0.0% push probability is neither counted as a win nor a loss.

FULL-GAME TOTALS · UNDER 54.5

APEX 50.9%

WEAK

FanDuel -110 · Fair -104

FanDuel posted 54.5 for the full-game total at -110 on the selected UNDER side when APEX sealed the T-2 position.

The locked TOTALS-V5-RECONCILED-POOL engine selects UNDER with a 50.9% calibrated win probability after keeping push mass separate, which maps to the WEAK tier.

At the exact FanDuel total, the frozen distribution assigns 49.1% to Over, 0.0% to a push, and 50.9% to Under.

The complete scoring distribution has a mean of 54.3, a median of 54, and a mode of 55 total points against the posted 54.5.

Its central 80% interval runs from 34 to 75 points, a 41-point span that exposes the model's scoring uncertainty rather than hiding it behind a binary pick.

The selected side's model fair price is -104 versus FanDuel's -110, with a -1.4-percentage-point probability edge and -0.028 expected units per unit staked.

The final call remains UNDER 54.5: it follows the larger decisive-outcome probability, while the 0.0% push probability remains a separate settlement outcome.
