RECONCILIATION · physical 786 – excluded post-kickoff 32 = prospective 754 (ATS 393 – 16 = 377; TOTALS 393 – 16 = 377). Excluded by slate: 2026-09-25 (2), 2026-09-26 (30).

HOW TO READ

Records use W, L, P (push), V (void) and pending. Win rate is W/(W+L).

Every grade settles the exact immutable issued proposition. No engine is rerun and no later FanDuel line replaces the issued line.

Ratings (WEAK / MODERATE / STRONG / ELITE) are ISSUED PROBABILITY BANDS on the selected win probability (cut points 0.52 / 0.54 / 0.58). They are retained exactly as issued and are evaluated, not assumed, in section E.

NCAA full-game spread and total settlement includes overtime unless the applicable issued-market rules state otherwise. A whole-number line landing on the result is a push.

KNOWN EVIDENCE LIMITATION · FANDUEL_SETTLEMENT_RULE_SOURCE=UNRECORDED_JURISDICTION_DETAIL: the jurisdiction-specific FanDuel settlement rule text in force for each issued market is not recorded in the evidence; every grade settles the issued line and price against the official final score.

A. YESTERDAY — TARGET-SLATE POSITION LEDGER (2026-10-08)

8 physical positions on 4 games; 0 excluded post-kickoff. FD P = same-side FanDuel no-vig probability from the issuance-time quote (two-way multiplicative normalization); Δ = APEX – FD.

C. PROBABILITY QUALITY AGAINST FANDUEL — PAIRED, IDENTICAL OBSERVATIONS

Each row pairs the APEX issued probability with the same-side FanDuel no-vig probability from the quote captured at issuance, on the same game, market and settled W/L outcome. Lower is better. Δ = APEX – FanDuel (negative favours APEX).

ENGINE	PAIRED N	APEX BRIER	FD BRIER	Δ BRIER	APEX LOGLOSS	FD LOGLOSS	Δ LOGLOSS	APEX < FD (BRIER)
ATS	369	0.249860	0.250850	-0.000990	0.692863	0.694848	-0.001985	193 of 369
TOTALS	369	0.251489	0.248853	+0.002636	0.696125	0.690853	+0.005272	184 of 369

Prospective W/L rows without a FanDuel comparator in their immutable grade (not in the paired table, listed by slate and sealed engine): ATS 8 [2026-08-29 (8, GLOBAL_EMPIRICAL_V1)]; TOTALS 8 [2026-08-29 (8, RIDGE_GAUSSIAN_A100_V1)]. FanDuel no-vig method as registered in each grade object: TWO_WAY_MULTIPLICATIVE_NORMALIZATION.

TOTALS — RETAINED FULL-DISTRIBUTION SCORES (APEX ONLY)

SCORE	N	VALUE	CONVENTION
PMF LOGSCORE (total PMF)	377	4.073412	retained integer-support PMF, read from the immutable grade
RPS	377	0.033890	retained integer-support PMF, read from the immutable grade
ISSUED PUSH PROBABILITY (mean)	377	0.000000	explicit in each sealed distribution

No FanDuel full-distribution comparator exists: a single total line and two prices do not determine a distribution over totals, so none is constructed. The paired FanDuel comparison above is on the binary selected-side probability only.

D. CALIBRATION (PROSPECTIVE W/L ROWS)

Calibration (is p the realized frequency?) and discrimination (does p separate outcomes?) are reported separately. Brier = miscalibration – discrimination + uncertainty (Murphy decomposition on the PAV fit).

E. RATINGS — ISSUED PROBABILITY BANDS, AS ISSUED

Each slate reports the engines physically sealed on that slate; earlier epochs are not relabelled with later champion identities.

Never-reset bounded confidence sequence and mixture e-process over every grade the canonical prospective court retains: 724 sealed predictions, 724 graded, 1448 sequence rows, activation epoch 2026-09-01T03:30:00Z. The court admits only positions sealed on or after its activation epoch, so its N per engine is smaller than the paired N in section C, which pairs every prospective-eligible grade that carries a FanDuel comparator. Framework: BOUNDED_HOEFFDING_STITCHED_CONFIDENCE_SEQUENCE_AND_PREDICTABLE_MIXTURE_E_PROCESS.
