RECONCILIATION · physical 1026 – excluded post-kickoff 32 = record eligible 994 (ATS 513 – 16 = 497; TOTALS 513 – 16 = 497). Excluded by slate: 2026-09-25 (2), 2026-09-26 (30).

HOW TO READ

Records use W, L, P (push), V (void) and pending. Win rate is W/(W+L).

Every grade settles the exact immutable issued proposition. No engine is rerun and no later FanDuel line replaces the issued line.

Ratings (WEAK / MODERATE / STRONG / ELITE) are labels on the selected win probability, assigned at issuance by the rating definition sealed with each position (tier_policy_sha256) and retained exactly as issued, except a separately recorded and verified pre-kickoff public revision. Original ratings and revision evidence remain in the position export; no grader run computes new ratings. The definition changed during the season, so a label has one meaning only within one definition and engine. Target-slate positions were rated under SLATE-QUARTILES-V3. A rating is relative confidence within its definition and engine, not a win probability; the model probability is shown separately (APEX P). Ratings are evaluated, not assumed, in section E, grouped by definition.

NCAA full-game spread and total settlement includes overtime unless the applicable issued-market rules state otherwise. A whole-number line landing on the result is a push.

KNOWN EVIDENCE LIMITATION · FANDUEL_SETTLEMENT_RULE_SOURCE=UNRECORDED_JURISDICTION_DETAIL: the jurisdiction-specific FanDuel settlement rule text in force for each issued market is not recorded in the evidence; every grade settles the issued line and price against the official final score.

C. PROBABILITY QUALITY AGAINST FANDUEL — PAIRED, IDENTICAL OBSERVATIONS

Each row pairs the APEX issued probability with the same-side FanDuel no-vig probability from the quote captured at issuance, on the same game, market and settled W/L outcome. Lower is better. Δ = APEX – FanDuel (negative favours APEX).

ENGINE	PAIRED N	APEX BRIER	FD BRIER	Δ BRIER	APEX LOGLOSS	FD LOGLOSS	Δ LOGLOSS	APEX < FD (BRIER)

BRIER VS FANDUEL, IN ONE LINE (lower is better) [R6][R7] · ATS APEX better (APEX 0.2499 vs FanDuel 0.2506, N=489) · TOTALS FanDuel better (APEX 0.2512 vs FanDuel 0.2489, N=489).

Record eligible W/L rows without a FanDuel comparator in their immutable grade (not in the paired table, listed by slate and sealed engine): ATS 8 [2026-08-29 (8, GLOBAL_EMPIRICAL_V1)]; TOTALS 8 [2026-08-29 (8, RIDGE_GAUSSIAN_A100_V1)]. FanDuel no-vig method as registered in each grade object: TWO_WAY_MULTIPLICATIVE_NORMALIZATION.

TOTALS — RETAINED FULL-DISTRIBUTION SCORES (APEX ONLY)

SCORE	N	VALUE	CONVENTION
PMF LOGSCORE (total PMF)	494	4.081461	retained integer-support PMF, read from the immutable grade
RPS	494	0.034193	retained integer-support PMF, read from the immutable grade

No FanDuel full-distribution comparator exists: a single total line and two prices do not determine a distribution over totals, so none is constructed. The paired FanDuel comparison above is on the binary selected-side probability only.

D. CALIBRATION (RECORD ELIGIBLE W/L ROWS)

Calibration (is p the realized frequency?) and discrimination (does p separate outcomes?) are reported separately. Brier = miscalibration – discrimination + uncertainty (Murphy decomposition on the PAV fit).

They are not rating cut points: each position's rating comes from its own sealed definition (HOW TO READ and section E). Small bins are shown with their N; nothing is pooled across engines.

E. RATINGS — AS ISSUED, GROUPED BY RATING DEFINITION

Historical labels are immutable and are not recalculated. Verified pre-kickoff public revisions are identified in the position export with their originals retained. Each band is reported within one engine and one rating definition (the tier_policy_sha256 sealed at issuance); CUT is that band's lower cut point on the selected win probability. N is shown for every band; tiny bands are not averaged away.

Ratings classify the issued probability; current prospective evidence does not establish monotonic realized performance across rating bands. Spearman rank correlation of band rank with realized W/L, within each engine and definition: ATS FOUR-TIER-V1 -0.053001 (N=19); ATS SHARED-51.75 0.004591 (N=238); ATS SHARED-52/54/58 0.032005 (N=125); ATS ENGINE-V2 -0.041355 (N=56); ATS SLATE-QUARTILES-V3 -0.071689 (N=59); TOTALS FOUR-TIER-V1 0.021071 (N=19); TOTALS SHARED-51.75 -0.014188 (N=238); TOTALS SHARED-52/54/58 -0.109786 (N=125); TOTALS ENGINE-V2 0.061011 (N=56); TOTALS SLATE-QUARTILES-V3 0.005148 (N=59). F. INTEGRITY SUMMARY

Counts are computed from the displayed rows. Line, price, probability and market-record checks compare each sealed position with the proposition its immutable grade settled.

CHECK	TARGET SLATE	PHYSICAL CORPUS	EXPECTED	NOTE
ISSUED	6	1026	—	—
SETTLED	6	994	—	—
PENDING	0	0	≥0	official result not final; settles automatically
VOID	0	0	≥0	voided under the applicable FanDuel rule
PUSH	0	0	≥0	line landed exactly on the result
EXCLUDED POST KICKOFF	0	32	≥0	issued after kickoff; visible, never scored
DUPLICATES	0	0	0	—
MISSING GRADES	0	0	≥0	pending rows without a grade object (expected while a game is not final)
MISSING ISSUANCE EVIDENCE	0	0	0	—
LINE MISMATCHES	0	0	0	—
PRICE MISMATCHES	0	0	0	—
PROBABILITY MISMATCHES	0	0	0	—
MARKET RECORD MISMATCHES	0	0	0	—
T2 SNAPSHOT MISMATCHES	0	0	0	grade settled against a T-2 snapshot other than the one sealed on the card
MODEL HASH MISMATCHES	0	0	0	positions whose sealed engine hash differs from their own slate and engine
ENGINE EPOCHS	2	36	—	distinct sealed (engine, hash) pairs; earlier epochs are retained as issued (Appendix 4)

Never-reset bounded confidence sequence and mixture e-process over every grade the canonical prospective court retains: 958 sealed predictions, 958 graded, 1916 sequence rows, activation epoch 2026-09-01T03:30:00Z. The court admits only positions sealed on or after its activation epoch, so its N per engine is smaller than the paired N in section C, which pairs every record-eligible grade that carries a FanDuel comparator. Framework: BOUNDED_HOEFFDING_STITCHED_CONFIDENCE_SEQUENCE_AND_PREDICTABLE_MIXTURE_E_PROCESS.
